

Advisory # 2019-A-020

Subject: 12542 – Glycol Tank 4 – PSL fence installation Phase 2

From: Aviation Services, Central Deicing Facility

Contact: Aviation Services, Manager of Operations (MO-AVS) 416-776-1102

Date: 2019-04-26

Please be advised, as of 0600hr May 6th, 2019, a temporary PSL fence will be relocated to delineate the construction site of the new Glycol Tank 4 at the Central Deicing Facility (CDF) building. The displacement of this fence will result in decreased clearance between the fence line and the adjacent taxiways. Therefore, Taxiway T between Taxiways E&F will be restricted to Code E aircraft and smaller for the duration of the project. Taxilane One will be closed between Tango and Pad Three.
